December 22, 2003 – OQ Partners announced today that the City of Monroe North Carolina has chosen eWebOQ as their training tool of choice as part of their multi-point plan to meet and maintain DOT compliance within the OQ area.

The Monroe decision came after reviewing their needs, reviewing the mandate, and reviewing products and services. It was decided that training would have to be a part of their plan and the eWebOQ product addresses training without causing any massive disruptions.

Additionally, the built in News feature will allow the city to communicate various changes and important notes 24 hours a day.

With eWebOQ the city will also instant access to training records and they can also grow the system as their needs may demand.
